Dravida-Utkala-Banga  
Vindhya-Himachala-Yamuna-Ganga  
Uchchala-Jaladhi-taranga  
Tava subha name jage,  
Tava subha asisa mage,  
Gahe tava jaya gatha.  
Jana-gana-mangala-dayaka jaya he  
Bharatha-bhagya-vidhata,  
Jaya he, jaya he, jaya he,  
Jaya jaya jaya jaya he!

## PLEDGE

India is my country. All Indians are my brothers and sisters.

I love my country, and I am proud of its rich and varied heritage. I shall always strive to be worthy of it.

I shall give my parents, teachers and all elders respect, and treat everyone with courtesy.

To my country and my people, I pledge my devotion. In their well-being and prosperity alone lies my happiness.

## Dear Children

Years ago, a man named Charles Babbage made an attempt to make a machine for calculation. Later, some others who came after him made it. This machine is the Computer. Now we can see this machine in shops, offices, banks, hospitals, houses and also in our schools.

This machine is a friend with whom you can play, learn, sing and draw.

This book will help you know more about this friend.

With love and wishes

## **Dear Teacher**

Information Technology at present has an inevitable role as a medium in inculcating learning in our schools. With the help of ICT, the learning activities have to be made much more productive. The most modern concepts and views related to education and technology are to be implemented in our schools also. ICT has become a necessity for this. It is as part of this venture that the textbook for third standard has been prepared. All the lessons and activities are designed in such a way as to help the teacher train the learners through simple games.

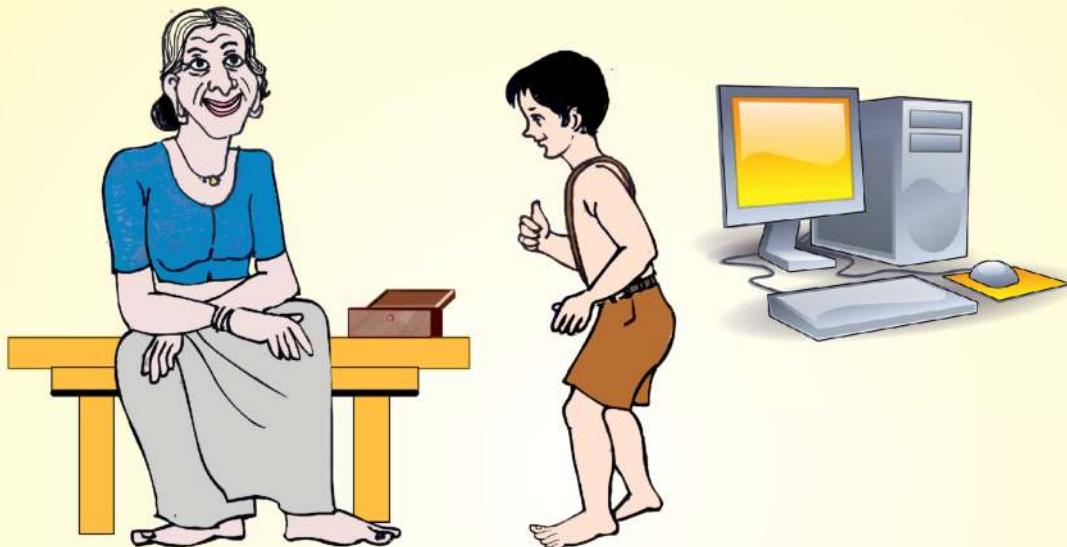

The content of this book incorporates suitable games to train and develop the learner's knowledge of Mathematics, Environmental studies, language and logic and enhance the memory power. Nearly ten mathematical games taken from daily life situations are provided in this textbook. Out of them, five are related to environmental studies, two games and one activity meant for language learning and others are for improving the logical skills and memory power.

Many activities and games of this textbook are well-suited to be used at the entry level of presentation, for providing motivation, and for evaluating the performance of the learners. You can also see that the resources are tailored for the classroom activities at the primary level such as picture- reading, preparation of graphic stories, dialogue construction, pattern building and so on.

# **COMPUTER AND GRANDMA**

After a long journey when grandma came home, she saw a new table and a computer in her drawing room. She was very anxious to know what it was. Seeing this Raju told his grandma.

Raju : Grandma, it is a computer. Now it is with this computer that children hear songs, watch films, play games etc.

Grandma : When I was a child, there was only a music box. But now there are so many things... T.V., Computer, Mobile phone...

Raju : Do you know there are lots of games in it? Come grandma... Let's see.

Grandma goes after Raju towards the computer.

## Lesson 1

# FIND THE TWINS

"Which animals are hidden in the cards? It is the first time I am seeing a Zebra".

"There is one more animal in it. Click on the cards and find it". Raju opened the Omni Tux game and said.

Click on the cards one after the other. Remember the picture on the cards. If you see the same picture, click continuously on it.

To the Game

Omnitux-light

Memory Cards

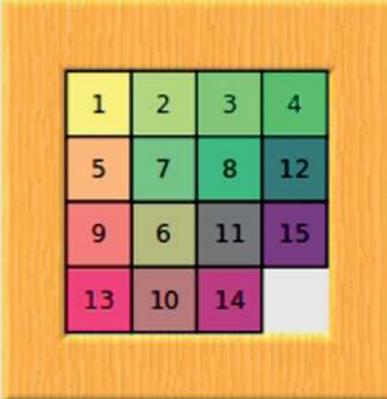

Animals

Click the cards on the screen one by one. See the figures on the other side and keep them in your memory. When you see two similar pictures, click continuously on each of them. They will disappear. Find out all the twins within a short time.

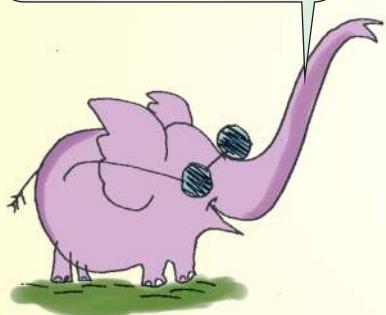

## Lesson 2

# ARRANGE THE NUMBERS

Using the tips given bzzzy grandma I could arrange the

Click on the boxes that are close to the empty box.

To the Game

GCompris

Puzzles

The fifteen game

Click the mouse on the blocks near the empty boxes to move the blocks.

## Lesson 3

# SUDOKU

Take the figures one by one to the empty boxes. For this click the figure first and then the empty boxes. Don't repeat this in any rows or columns in any particular area. If there are numbers, you should type them and add to it.

Each figure in the picture  
has its own place. More  
over the figures have an  
order also.  
We must find it out.

To the Game

GCompris

Puzzles

Sudoku, place unique  
symbols in a square

At first choose each figure from the left side and click on suitable places. In the next level when you want to use the digits, click on the empty boxes and type the digits using a keyboard. Sukodu will not allow you to type wrong details.

## Lesson 4

# LOOK AT THE SKY

"Thiruvathira' like a fire ball  
'Punarartham' like a skiff...."

Looking up the sky grandma said aloud.

"What is like a fire ball...?" Raju asked.

Have you heard of a group of stars in the sky having the shape of a hunter? Are there any similarities between what Raju and his grandma were saying?

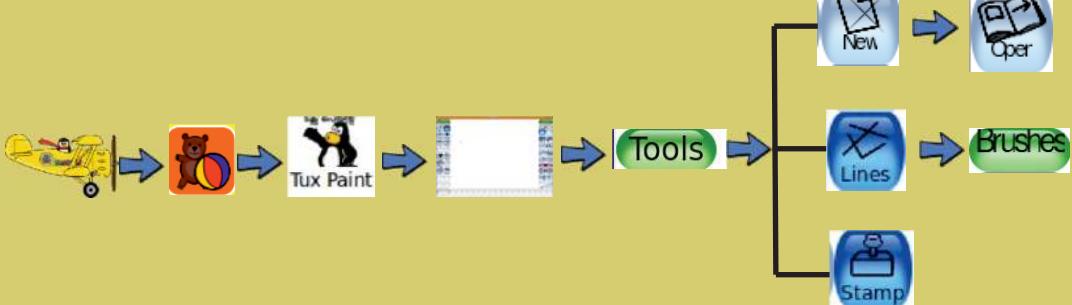

Do you observe the sky?

Observe the sky during the night and draw the picture in the computer.

To the Game

Open Tux paint. You can see the Tools menu on the left side of the screen. There are various tools like Paint, Stamp, etc. Each one has its own sub tools also. E.g. When we click on the Paint tool, we get many types of brushes. On clicking Stamp tool there are many pictures and on the Text many letters. On clicking "New" we get sheets of different background colours.

## Lesson 5

# WATER, THE ELIXIR OF LIFE

Heavy rains of  
'Thiruvathira, Njattuvela'  
and 'Makeeryam' are now  
only in memories.

When the rain came...

What are the changes seen in nature after rain?  
Have you ever watched them?

To the Game

Choose the suitable Stamp

Ask the learners to draw a picture showing the changes after and before the rain. Tell them to use the stamps in the Tux Paint. Let them draw beautiful pictures according to their imagination using brush, shapes, lines, eraser, paint, etc.

## Lesson 6

# HEAR AND RECOGNISE

"Dear son....stop playing and study everything your father asked you to do...."

"I am studying, grandma..."

Click the question mark in the picture. Listen to the sounds of letters. Drag the suitable ones on to the question mark, using the mouse.

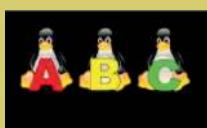

To the Game

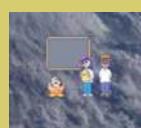

**Omnitux-light**

**Writing**

**Letters**

Listen to the voice. Drag the suitable letters on to the question mark. Do the levels 2 and 3.

In this way we can activate letters A to F board and scramble letters.

## Lesson 7

# HOW MUCH IS THE BALANCE?

Tux is buying things from a shop. Count the total cost of the things Tux bought. Don't forget to give the balance to Tux.

Select the amount to give Tux from this part.

How much is  
the balance?

To the Game

GCompris

Mathematics Numeration

Go to money  
activities

Give Tux  
his change

Find the sum of the things Tux bought. We can see the money that he gives. Click on the balance amount and press OK.

## Lesson 8

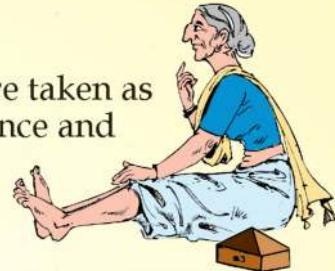

# KNOW THE WEIGHT

Raju never understands many things that grandma tells.

'Panathookkam', 'Rathal', 'Tula'...etc.

You can see that the units of weight are taken as grams and kilograms in common balance and electronic weighing machines.

Using the mouse place suitable weights on the balance.

To the Game

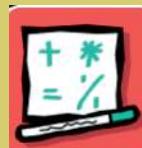

GCompris

Mathematics

Go to calculation activities

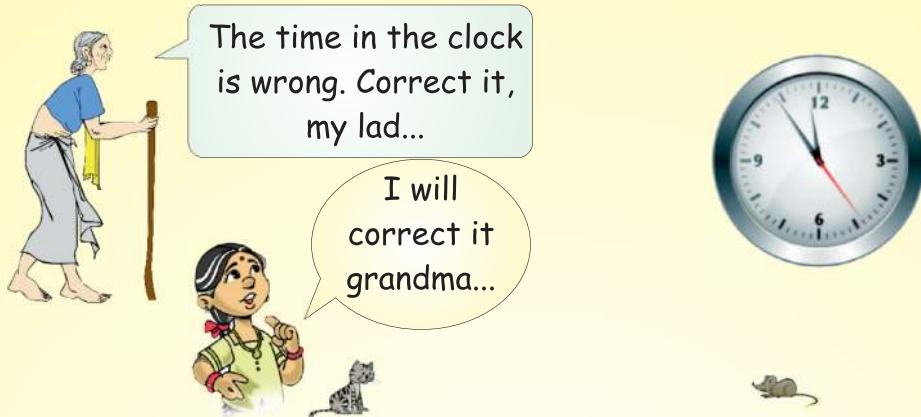

Balance the scales property

Help the learners to equalise the weight. Children get the idea that if weights on both sides are equal, the balance will remain straight.

## Lesson 9

# TIME AND DATE

Though grandma asked Radha to correct the time in the clock, she was a little bit nervous to do it. What is the solution to help Radha to change the time correctly?

Shall we play a game to adjust the time in the clock?

A screenshot of a computer game window titled "GCompris". Inside the window, there is a large, ornate gold clock face with many numbers and hands. A digital display at the bottom left shows "09:45". A pink speech bubble labeled "Time" points to this digital display. Another pink speech bubble on the right says "Click on the hour hand. Then move it clock-wise". A cartoon character of a boy in a blue shirt and shorts is standing to the right of the clock, pointing towards it. The window has a progress bar at the top right showing "1/3". At the bottom of the window are several colorful icons: a question mark, a left arrow, a right arrow, a home icon, and a star icon.

To the Game

**GCompris**

**Go to discovery Miscellaneous activities**

**Learning Clock**

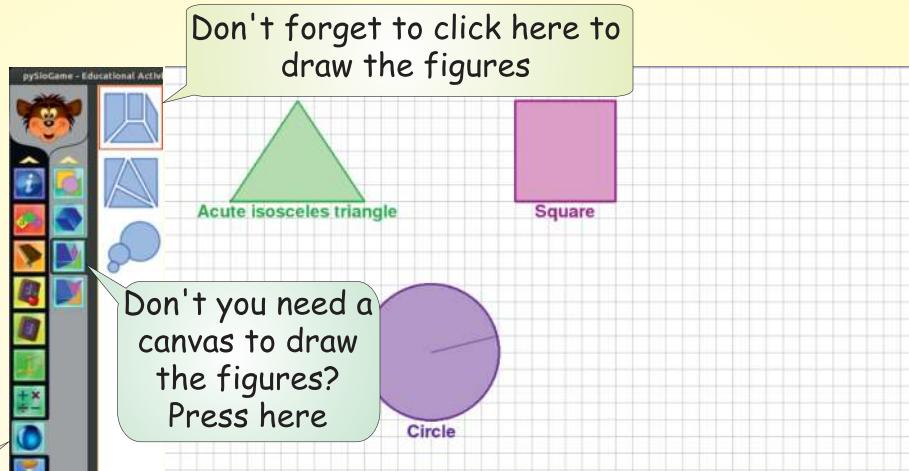

Complete the three activities at the first level itself. After that we can give the second level activities. Let setting the hour-minute-second time be the last activity.

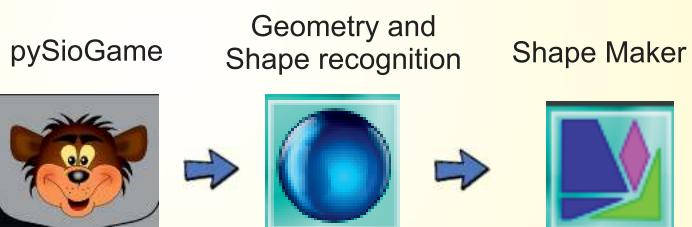

## Lesson 10

# WHEN FIGURES COMBINE

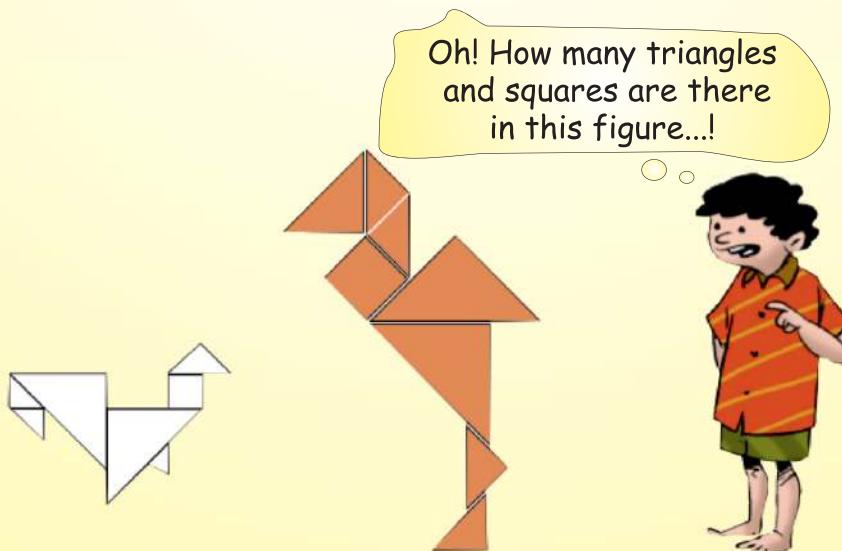

There are so many figures around us, aren't there? Can you draw these figures? Try to draw these figures in pySioGame.

Open pySioGame.  
First click on the  
tool to draw the  
figures.

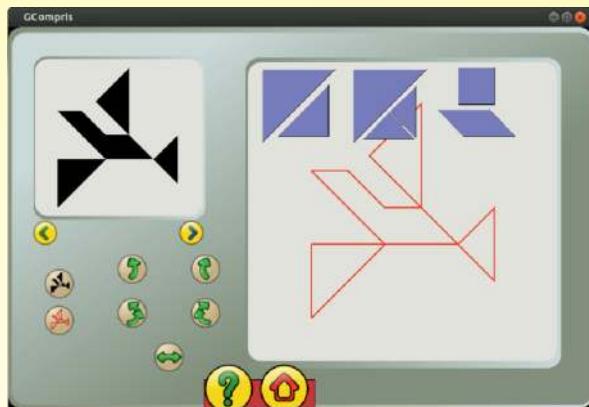

Wow! What figures.....!!

**Do you use GCompris to play this game?**

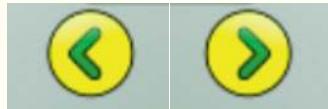

You can see some figures on the right side of the window. Take them one by one to draw a figure as you see on the left side of the window.

**You can turn the figures left and right**

How can I get  
a new figure?

Click on the arrow  
just below the left  
figure.

To the Game

**GCompris**

**Puzzles**

**The tangram  
puzzle game**

## Lesson 11

# FIND THE WAY

Lakshmi and her parents are returning from her uncle's house. As they are late, their uncle is taking them in his car. On the way they are trapped in a heavy traffic block. They are travelling in a red car. Remove the block in front of their car and show them the way out.

Show the way to get out...

To the Game

GCompris

Puzzles

A sliding-block  
puzzle game

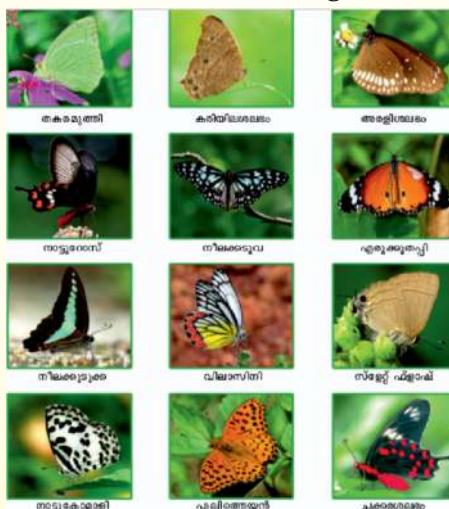

Blocks will move horizontally and vertically only. To move them click and drag.

Lesson 12

## FLAPPING COLOURFUL WINGS

What kind of butterflies do you see in your garden  
and surroundings?

**Butterfly Album**

To make the album

**Choose the suitable  
stamps of butterflies**

Open Tux Paint. Take a new canvas. Make the album using the Stamp tools.

## Lesson 13

# WHICH WORD?

"Can you help to build a word using the letters on in the screen?" Raju asked his mother.

"Remember the words you studied at school. What you need is, only to arrange the letters in the correct order."

To the game

Open Kanagram. You will get a word when you arrange the letters. Type that word in the white box seen below.

To check the answer click on the icon.

**Applications - Education - Kanagram**

## Lesson 14

# ROWS AND COLUMNS

- Raju : How many plantain trees are there in our garden, grandma?
- Grandma : Count them my lad...
- Raju : How can I count all these plantain trees?
- Grandma : There is an easy way. First count the rows.
- Raju : 3 rows.
- Grandma : Then now count the columns.
- Raju : 6 columns.
- Grandma : Isn't it easy to count the plantain trees now?

        	1	2	3	4	5	6	7	8	9	81	1	2	3	4	5	6	7	8	9
	2	4	6	8	10	12	14	16	18		72								
	3	6	9	12	15	18	21	24	27		64								
	4	8	12	16	20	24	28	32	36		63								
	5	10	15	20	25	30	35	40	45		56								
	6	12	18	24	30	36	42	48	54		54								
	7	14	21	28	35	42	49	56	63		49								
	8	16	24	32	40	48	56	64	72		48								
	9	18	27	36	45	54	63	72	81		45								

7 × 9 =

42 40 36 35 32 30 28 27 25

Open pySioGame and try some operations of multiplication.

## Lesson 15

# FINDING THE MULTIPLIERS

'You must take the suggested multipliers only.'

'You need to take them using space bar.  
Similarly do the other activities.'

**GCompris**

Multiples of 2						
2	9	5	9	4	2	
7	5	6	9	3	9	
9	10	9	6	10	8	
11	10	6	11	9	3	
3	5	4	11	11	4	
8	2	11	9	6	4	

To the Game

**GCompris Mathematics**

Go to  
calculation  
activities

Go to number  
Muchers  
activities

Multiple  
Number  
Munchers

Move to the target according to the instructions using arrow key. To swallow the number use the space bar. If you go wrong, press enter key. If you make two mistakes, you will go back to the starting point.

## Lesson 16

# THROUGH THE LAND OF KERALA

Manu and his family who went to Kasaragod to celebrate his birthday returned to Thiruvananthapuram in a train. Manu marked his journey from Thiruvananthapuram to Kasaragod through Alappuzha in his Kerala map. He marked his railway route as given.

### Activity 1

1. Pathanamthitta
2. .....
3. .....
4. .....

Now, try to mark Manu's rail route. Use Tux Paint to do this.

In this journey Manu did not travel through some districts. Which are they?

1. Pathanamthitta 2. .... 3. .... 4. ....

To get the Map

Use Tux paint to do this activity.

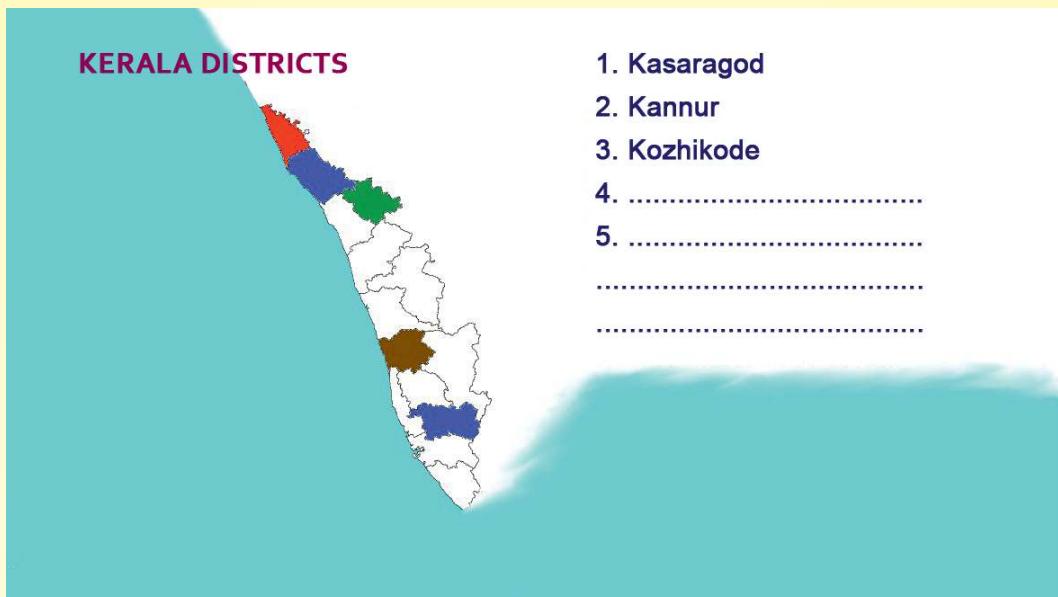

Use suitable stamps.

Use suitable brush and colour.

## Activity 2

### Colouring the districts

## Activity 3

These are the details which Manu wrote about Wayanad district.

District	:	Wayanad
District Headquarters	:	Kalpetta
District formed in	:	1980
Neighbouring districts	:	Kannur, Kozhikode, Malappuram

Find out your district and neighbouring districts from Tux Paint and write them down.

To the Tux paint

Use suitable stamp

You can get the necessary details of each district from the stamps

## Lesson 17

# DIVIDE EQUALLY

"There are 15 unniyappam", Raju said after counting them. "How can we share them?" Radha doubted.

         	1	2	3	4	5	6	7	8	9	2	4	6	8	10	12	14	16	18	3	6	9	12	15	18	21	24	27	4	8	12	16	20	24	28	32	36	5	10	15	20	25	30	35	40	45	6	12	18	24	30	36	42	48	54	7	14	21	28	35	42	49	56	63	8	16	24	32	40	48	56	64	72	9	18	27	36	45	54	63	72	81
